Setting Up RFID in PocketDairy

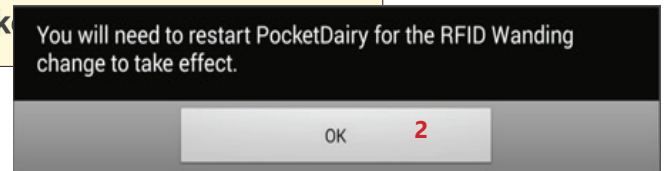

PocketDairy is compatible with a variety of RFID wands, allowing for effortless animal lookup cow side. Featured below is a quick and easy guide to help you get started!

To Set Up RFID In PocketDairy Android:

1. Tap **Menu** and go to **Settings** and select **Enable RFID wandering**

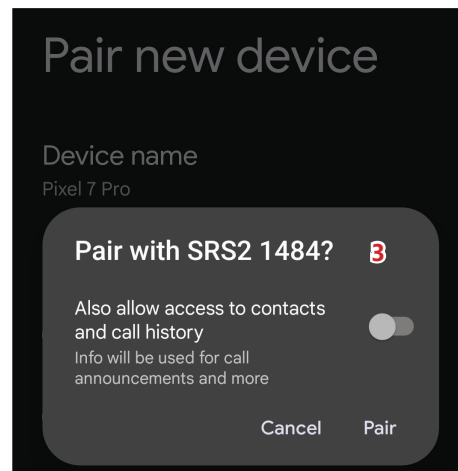

2. The message **"You will need to restart PocketDairy for the RFID wandering change to take effect."** is displayed. Select **ok**

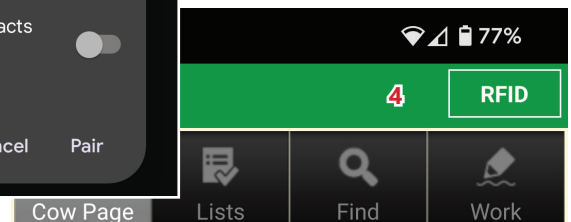

3. In your device's Bluetooth settings, **pair** your wand with the device

Note: You may need to allow Bluetooth permission request upon pairing

4. In PocketDairy tap **RFID**

5. Select the wand under Paired Devices
6. Start wandering animals
