

Tuesday!

Activity Tracker is a valuable resource for analyzing herd events. Last week we explained how users can evaluate health events, protocols, and individual chores. Filters, such as string numbers, remarks, and calving date ranges, may be added for additional insight. Settings may be saved for continual reference. To create a new setting:

1. Select the type of report, either month or days in milk
2. Indicate cows or heifers and the desired lactation(s) to view
3. Specify the desired date range
4. Add the events, protocols, or chores to be viewed

5. Add values to the filter by group, temp group, string number, or user-defined field

6. Use the drop-down arrows to alter the calving date range

7. Counts are now displayed in the grid
8. Click inside a cell to see a list of specific animals
9. Save or print the list, view an individual cow page, assign animals to a temp group, or export to Excel for additional analysis

Activity Tracker Report Options: 42998888

Setting Name Save Load Delete

Main Settings **Cohorts** Filters

Calving Cohort

From **6** To ☒ Ignore calving cohort

Age at Calving in Months

Between ☒ Ignore calving age

Birthdate Cohort

From To ☒ Ignore birthdate cohort

☒ Count Repeats in Lactation Preview
