

HotSheetPro

DECISIONS FOR THE WAY YOUR DAIRY

Get a Quick, Visual Udder Health Analysis

HotSheetPro provides a customized and dynamic hotsheet soon after the lab data arrives at DRMS. Quickly make management decisions with visual cues on infection status, bulk tank SCC contribution, and the comparison of udder health from last test. Sort, group, and filter results right in the grid, export to excel, and drill down to individual cow pages with CowCompass.

Access HotSheetPro

- **Log in** to your DRMS account at **drms.org**
- Select **HotSheetPro**

Creating A New Report:

1. Select **Create New Report** button
2. **Name** report and enter Herdcode if not already pre-filled
3. Select **Report Type** to view All Cows, High SCC Cows, or Max Bulk tank SCC Cows
4. Define **SCC Thresholds** for infection level, Cow Max SCC, and desired bulk tank SCC

Note: Hover over question marks to learn more about that field to guide inputs and report type

5. **Save** then **View Results**

Viewing HotSheetPro Results:

6. **Header** provides test day totals and averages for easy reference
7. **Results Grid** automatically sorts by highest Current TD SCC. Select desired column header to sort ascending or descending by that value or drag it above all column headers to group by that category
8. **Filter Infection Status** to see only those animals. Colors and Icons help quickly identify Chronic, New, New Fresh, or Improved cows.
9. Select **Eye Icon** to view more details for that cow in **CowCompass**
10. **Export to Excel** for further analysis

+ Create New Report 1

Drag a column header and drop it here to group by that column
