DAIRY**

PocketDairy

Mobile Herd Information and Cowside Data Entry

How It Works

PocketDairy extends the power of Dart beyond the office by putting herd information and cowside data entry tools in the palm of your hand. Available for Android phones and tablets, PocketDairy lets you access herd information and record events wherever work happens.

Whether you're checking fresh cows, recording treatments, completing herd checks, or reviewing individual cow records, multiple users can keep herd information current across the farm with PocketDairy, included with Dart Core.

What It Supports

Access Records Anywhere

Review herd information when and where you need it.

Enter Data Cowside

Record events and management updates while you're in the barn.

Vet Check Maxx

Streamline herd checks with records and data entry on a single screen.

RFID Compatible

Identify cows quickly and simplify data collection.

Connected to Dart

Keep herd information connected between the barn and your Dart computer. Work offline and sync later.

Answer the Questions in Your Herd Data

Where PocketDairy Helps

Whether you're checking cows, recording events, or reviewing herd information, PocketDairy helps you quickly answer common herd management questions, such as:

Cow Information

What do I need to know about this cow before I make a decision?

Real-Time Recordkeeping

Can I record this information now instead of trying to remember it later?

Daily Workflow

Can I make this decision without going back to the office?

Team Coordination

Has this animal already been updated, or does it still need attention?
