

WebReports

Online Access to Your DHI Reports

How It Works

WebReports provides secure online access to your DHI reports as soon as herd processing is complete. Receive email notifications when new reports are available and view, print, or save report PDFs from any computer.

Access an extensive history of Herd Summary (DHI-202) reports and the most recent three months of all other DHI reports through your DRMS account. Whether you use WebReports alongside mailed reports or transition to digital access, WebReports makes it easy to retrieve the herd information you need.

What It Supports

Faster Access

View reports online as soon as herd processing is complete

Email Notifications

Receive an email when new reports are available

View, Print & Save

Access report PDFs anytime from your DRMS account

Report History

Access an extensive history of Herd Summary (DHI-202) reports and the most recent three months of all other DHI reports

Flexible Access

Use WebReports alongside mailed reports or transition to digital access

Answer the Questions in Your Herd Data

Questions WebReports Helps Answer

Use WebReports to access your DHI reports online and quickly answer herd management questions like these.

Production

Are my cows producing what they should?

Reproduction

Is my reproductive program staying on track?

Udder Health

Is udder health affecting milk quality or production?

Herd Management

What herd trends need my attention this month?

See how WebReports can give you faster access to your DHI reports
