Tip Tuesday!

RapidReports brings your reports to mobile devices

Take your Dart reports with you on the go with RapidReports, the newest tool on the HerdHQ platform. Build, edit, and view reports from any browser or device using your test day or DartSync data.

Easily sort or group results, drill down to CowCompass, or export to other programs. RapidReports integrates with alerts established in other HerdHQ tools for seamless data analysis.

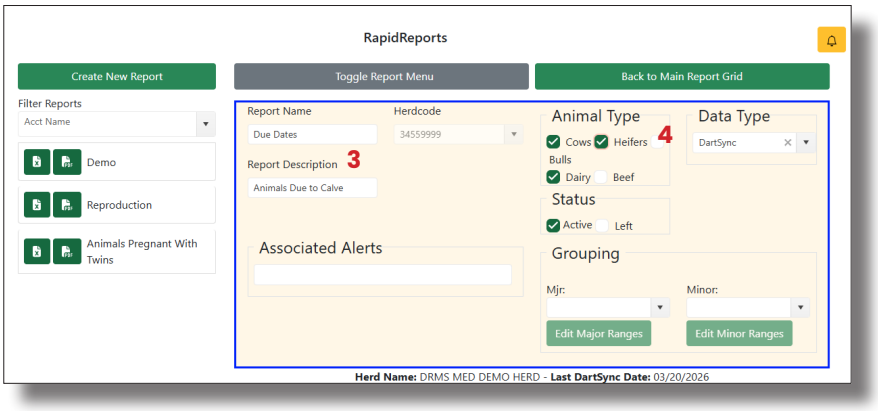

Accessing RapidReports

Select the HerdHQ icon in Dart or log into drms.org then choose RapidReports.

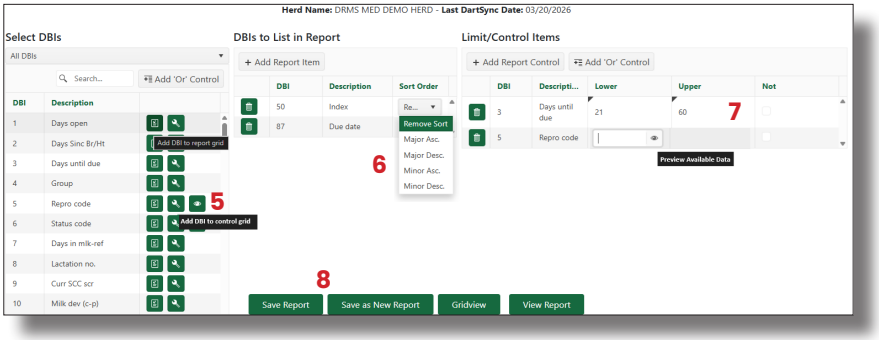

1. Modify or view existing custom and Standard Reports as a PDF or Grid

Note: PDF opens in a new tab in browser, Gridview opens in current tab

Create a new report

2. **Create New Report**
3. Give the report a **name** and **description**
4. Choose desired **animal** and **data type**
5. **Search** available DBIs or use **Add Report Item** button
   - Select small **report icon** to add that DBI to the List section
   - Select the small **wrench icon** to add that DBI to the Limit/Control section
   - Select the **eye icon** to view additional details regarding that DBI
6. Choose a **sort order** for any DBI in the list
7. Set **Lower** and **Upper limits**; activate the checkbox in the "Not" column to omit values
8. **Save** or **View Report** as a Grid or PDF

Note: Some Database Items (DBI) have different options for controls than in Dart so pay particular attention when setting lower and upper limits

Note: If an Alert was created in another HerdHQ tool, you can activate that alert once the associated DBI has been added to the report. View alerts by selecting the yellow alarm icon.

9. Select **Back to Report Config** to continue modifying report or to save
10. **Back to Main Report Grid** returns to the list of all available reports
11. Select **Animal Identification** to view additional details in CowCompass
12. **Sort** results by toggling header field
13. Drag a **column header** to the top to group by that column
14. **Search** for a particular animal
15. **Only show** animals with activated alerts
16. **Export** to .xlsx, .csv, or .pdf

Note: Totals and averages for reports viewed as a PDF will display at the top of the page in RapidReports instead of the bottom of the page in Dart
