Tip Tuesday!

View Your Herd on the Web with CowCompass

CowCompass allows you to view your herd data from any device with a web browser and internet access. Simply access HerdHQ from the icon in Dart or after logging into drms.org. CowCompass displays ID, lactation, test day, breeding, health, genetic, and even Zoetis or ABS genetic data for quick cow-side decision-making.

Search

- Cows, Heifers, or Bulls
- Index or Barn name
- Groups
- Official ID
- Active or Archived

Additional Data

Not in Dart

- FreshCowIndex
- 305AA values for Milk, Fat, Protein and SCS
- Test day Relative Value for Milk, Fat and Protein
- More complete Genomic and Genetic data
- Test day Milk, Component and Udder Health charts
- Zoetis and ABS proprietary traits

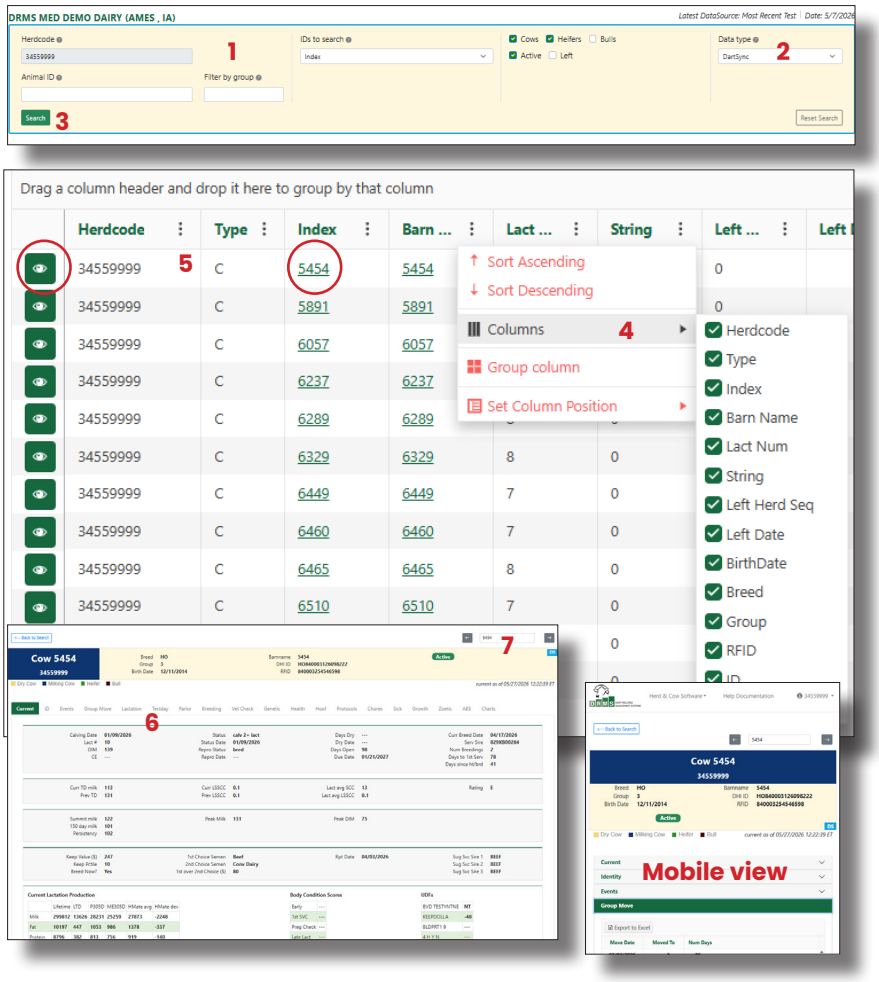

With DartSync

- User Defined Fields
- Suggested Service Sires
- KeepOrBeef metrics
- Health events
- Expanded and dynamic charts
- Tabs for Group Movement, Parlor, Sick Herd, & Hoof

Using CowCompass

Log in to your DRMS account at **drms.org**, then **CowCompass** from the HerdHQ landing page, or select the HerdHQ icon from inside Dart

1. Enter **herdcode** if not prefilled, specific **Cow ID** if desired, **type of ID**, and **filter by group** if necessary

2. Select **data type**, either DartSync data or most recent test
3. Click/tap **Search**. A list of animals that meet the criteria will appear

Note: number of results to view per page and total number of results with the ability to scroll between pages at the bottom of the list

4. **Customize** search results by reordering, sorting, hiding, or grouping columns
5. Select **ID** or the "**eye**" icon to view individual animal data
6. Select various **tabs** to view different data with the option to **export to Excel** for further analysis
7. Enter a new index or **scroll** through the herd

CowCompass and the entire HerdHQ platform is available for any herd that processes test day data with DRMS.
