Tip Tuesday!

Conceptualize Your Data with DairyDepot

DairyDepot, part of the HerdHQ platform, displays test day or DartSync information on customizable dashboards for quick, visual analysis. Data comes to life through multiple grid and graph formats grouped by management areas with the ability to drill down to CowCompass. Export to excel, save as images, and print entire dashboards with ease.

Using DairyDepot

Choose the HerdHQ icon in Dart or log in to your DRMS account at **drms.org,** select **DairyDepot** from the HerdHQ landing page.

Create Dashboards

1. Select the **Settings/gear icon**
2. Select the **Add Tab** button. **Name** your dashboard and **drag** to change position in the list of all dashboards

Build Dashboard

3. Choose **widgets** from various management areas. **Search** for specific items or **filter** by charts or grids
4. **Drag and drop** desired chart or grid into center dashboard area. Drag widget to change position or select the X to remove it.
5. **Save** then select the grey **boxes icon** to view finished dashboard

View Dashboard

6. Enter Herdcode and RAC if necessary (Producers will have this pre-filled.)
7. Select the **source** of your data (DartSync or Test Day), limit by start date or permanent string if desired, then **Load** data
8. Choose desired dashboard
9. Use the **Settings/gear icon** to edit, delete, or add Dashboards

Customize Charts

10. Select titles in the **legend** to limit data with multiple series
11. **Export** charts or grids to excel and export graph images as a .jpg or .pdf
12. Select individual animals to drill down to **CowCompass**
