Tip Tuesday!

Track Herd Activity with HerdHighlight

Available within the HerdHQ suite of products, HerdHighlight allows you to conveniently track and monitor activities such as health events, pregnancy diagnosis, vet check, status changes, and left/sold animals via pre-defined summaries. Data may be grouped by day, week, or month, with the ability to choose between DartSync or Test Day information to best meet your objectives. View detailed information with the seamless integration of CowCompass, export data to Excel, create visual alerts, filter results, and even create health event groups for efficient data analysis.

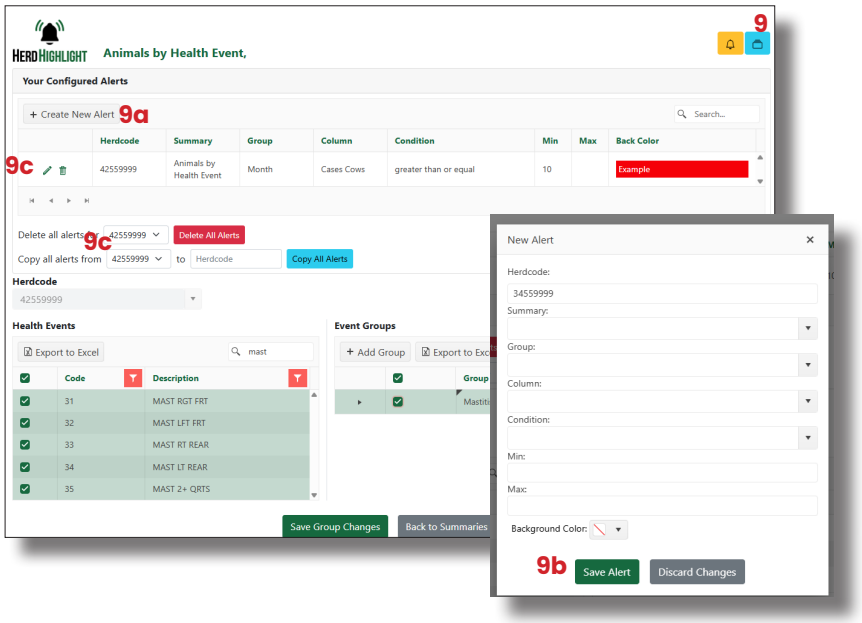

Access HerdHighlight

Select the HerdHQ icon from within Dart or log in with your credentials at drms.org, then **HerdHighlight** from the HerdHQ landing page

Using HerdHighlight

1. Enter **Herdcode** if not already pre-filled
2. Select the desired pre-defined **Summary** to view from the drop-down menu
3. Enter desired data filters:
   a. Start date
   b. Data type (DartSync or Most Recent Test)
   c. Group data (daily, weekly, or monthly)
   d. Week starts on (day of the week)
4. Select **Get Summary**
5. Certain summaries allow results to be **filtered** by health event groups, protocols, chores, or descriptions
6. **Export** results into a .csv or Excel .xlsx file
7. Activated alerts will appear in their designated color
8. Select the number inside any cell to view that list of animals in **CowCompass** in a new tab. Further drill down into their individual pages as desired

Adding Alerts and Health Event Groups

9. Add visual **Alerts** for any metric using the yellow bell icon.
   a. Select **Create New Alert**
   b. Define parameters and **Save Alert**
   c. Alerts can be edited, deleted, and copied to additional herdcodes as needed

10. Create **Health Event Groups** using the blue file cabinet icon to condense analysis of similar health conditions.
    a. Search and select the individual health conditions to group into one sub-category
    b. Select **Add Group**, give it a name, then check the box
    c. **Save Group Changes**
    d. Toggle the small black arrow to see included health conditions
